

# Can a 12-year old successfully start & run his own COMPANY?

The answer to the above question is a BIG YES!!! Instances have shown that children, as young as 9-10 years old have created a remarkable history by embarking on the journey of ENTREPRENEURSHIP. Most of us, at 10, isn't even aware of that scary-looking world. But there's nothing to worry about. Let's start from the basics:

Have you ever had recognized a problem around you and tried to solve it? I am sure you all have, at least once in life. But what most of us do is to forget about it or not consider spending time thinking over it. But just imagine, if you take out some time, work over an idea or a solution and take it one step ahead by "building a STARTUP" out of it, it won't be anything less than OLA Cabs or Google who were once a STARTUP by enthusiastic people.

Are you thinking " THIS SEEMS UNREALISTIC? "

Let me show it to you by giving examples, the below-mentioned are short stories of the Youngest Entrepreneur in INDIA and motivation for thousands!!!

This is the story of **TILAK MEHTA**, founder, Paper n Parcel, is the World's Youngest, who Entrepreneur who made a Digital Courier Company by providing One-Day parcel service, with the help of "[Mumbai Dabbawala](#)."

Tilak is no other than any teenager in India. He is a typical 8th grader studying in Mumbai, who still complains about his father, coming home from the office late. It was not until one day when an incident occurred, where Tilak wanted a few books from another end of the city urgently. He couldn't ask his father as he came home tired after a day's work.

So, Mehta was left with no options but to wait for another day and got amazed when his father told him that the courier charges to deliver the book would cost even more than the book itself!!

Mehta wanted to use the network chain to parcel even the non-food items across the town.

Papers N Parcels is a startup which provides door to door pick-up & delivery services ranging from a pen to all your essential documents. When asked about his young age, Tilak Mehta said "It didn't matter if I am young and still in school. I took it up as a problem that is waiting and wanting to be solved. And after that, there was no turning back!"

Similar to Tilak, there are thousands of more such children with outstanding ideas, want-to-be entrepreneurs, the difference is just to STEP UP!!
